

# We knuckled down and made sure 915 stores were ready to reopen

After a long lockdown due to COVID-19, swift action was necessary as Flying Tiger Copenhagen's 915 stores were prepared for a safe reopening.

We produced floor decals and signs for shops all over Europe. And we did it quickly.

In just three days, we printed thousands of square metres of decals and packaged a 32-piece 'reopening kit' for each store.

*We asked Stibo Complete to help us produce POS materials for all of our stores in Europe in connection with the reopening after the coronavirus lockdown. Stibo Complete acted quickly, and our materials were produced and delivered in just three days. You can count on Stibo Complete, which is especially important when you need to move fast.*
