

Printed on green values – The Financial Services Union’s new magazine

Stibo would like to congratulate the Financial Services Union on their choice of magazine, which is printed on green values and thus takes responsibility for the environment.

The first edition of the magazine FINANS, which was published in January 2022, was produced with a minimum CO2 footprint here at Stibo Complete.

A mutual wish for a sustainable future

The Financial Services Union and Stibo Complete have a mutual desire to take responsibility – both when it comes to people, the environment, and our planet. Therefore, they also made the decision to get the magazine marked with the FSC-label, the Nordic-Eco-label, and the Climate Calc-label.

At Stibo, we are incredibly pleased with the result and the great collaboration. Together, we have achieved a publication that lives up to the demands of the future.
