

Creating visibility with Compass Fairs

Compass Fairs is a professional full-line supplier of all technical and graphic equipment for fairs, events, congresses, and conferences.

Building a well-functioning and visible trade fair requires many different elements, and exactly that is Compass Fairs' main competence and skill. They have extensive experience in producing and delivering modular stand walls, foils, fascia and many more trade fair solutions for both Denmark, Sweden, and Norway.

Over the past two years, Compass Fairs has collaborated with Stibo Complete, where we have helped them with various solutions.

Over the past two years, we have built a solid collaboration with Stibo Complete, and they are always service-minded and solution-oriented. We experience great flexibility, and deadlines are always met.

Head of Department at Compass Fairs

Development of an efficient system

With short and sharp deadlines that must be met, a focus on flexibility and quality is always important when it comes to trade fairs. Together with Compass Fairs, we have helped develop a system that ensures that all goods are delivered to the right stands on time.

The ability to deliver material to several hundred stands individually packaged and labeled requires sharp handling. Exactly that Stibo Complete is always able to achieve.

Eco-friendly materials in focus

The demand for eco-friendly materials is on the rise in the market. Therefore, we have helped Compass Fairs with the development of new products made of environmentally friendly materials. In addition, we have ensured that all the relevant environmental certifications for the various elements and solutions for the fairs are in place.
