

# Kolmården Halloween 2021

---

Gigantprint in Sweden, that is a part of Stibo Complete, has delivered decorations for Kolmården Djurpark through a number of years.

The collaboration holds both standard reordering as well as development and rethinking of ideas for decorations.

Kolmården Djurpark is located south of Stockholm and as a wildlife park it is home to countless animal species, exciting amusements, and magic shows.

## Scary Halloween

For Halloween 2021, we have delivered a scary and exciting exhibit for the ones that dare enter! Gigantprint has delivered everything from printed matter, signs, tarp banners, cloth banners, posters, stickers, flags, etc. One of the great tasks was the 3D pumpkins made from polystyrene that adorn the entrance of Kolmården. All materials are of course made for outdoor use and tolerate all kinds of weather.

We are very pleased with the always exciting collaboration and the fun tasks.

*Our great advantage is the number of different materials we work with. There's a solution for every purpose. The great 3D pumpkins and the theatre background are great examples of this.*
