

The magazine matches THE VELUX FOUNDATIONS' sustainable vision

VILLUM FONDEN and VELUX FONDEN are two non-profit foundations working under a common umbrella: THE VELUX FOUNDATIONS. Every day, both foundations work to support environmental, social and cultural research and causes both at home and abroad.

Stibo Complete, has helped to produce the annual magazine for THE VELUX FOUNDATIONS for three years. We provide design, DTP, proofreading, project management, English translation, printing, finishing and distribution – as well as an [online version of the magazine](#).

Printed with care for the environment

The annual magazine is printed on 100% chlorine-free recycled paper, which is FSC® and Climaware certified, ensuring CO2 neutralisation.

The climate and environment are key focus areas for THE VELUX FOUNDATIONS, which has distributed more than DKK 1.6 billion to projects focusing on the environment and sustainability from 2008–2020.

The foundations therefore also have a strong desire to produce the annual magazine as sustainably as possible.

For 3 years, Stibo Complete has produced our most important print job from start to finish – and having a supplier that can handle all processes and deliver top notch quality is fantastic!

Charlotte Korsager Winther

Head of Communications for THE VELUX FOUNDATIONS
